### Honey Bee Farming (Madhumakshika Palan) Training Workshop

The Honey Bee Farming (Madhumakshika Palan) Training Workshop was successfully conducted on 23/01/2022, aimed at providing students with insights into the field of beekeeping, honey production, and the various career opportunities it offers. The workshop was organized by the faculty, with expert guidance provided by experienced professionals in the field.

#### Program Highlights:

The event began with a welcome and introduction by Asst. Prof. Sase Keshav, who shared the purpose of the workshop and highlighted the growing importance of beekeeping in sustainable agriculture and entrepreneurship. He encouraged students to explore the potential of honey bee farming as a viable career option.

Asst. Prof. Nikam G.A. delivered an insightful speech on honey bee farming, covering the essential aspects of honey bee management, honey production, and the business prospects in the beekeeping industry. He also discussed various career opportunities for students, including roles in agriculture, environmental conservation, and entrepreneurship related to honey production and by-products. Dr. Onkar Rasal, the president of the program, provided further guidance to the students, stressing the importance of honey bee farming in environmental sustainability and the potential for students to contribute to this growing field. He encouraged students to pursue practical knowledge and develop skills that would help them succeed in beekeeping and related industries.

The program concluded with a vote of thanks delivered by Asst. Prof. Ganesh Shelke, who expressed his appreciation to the guest speakers, the organizing committee, and the students for their active participation, which contributed to the success of the workshop. The workshop was skilfully anchored by Asst. Prof. Prajakta Sabale, who ensured the smooth flow of events and maintained the engagement of the participants throughout the program. This workshop served as an excellent platform for students to learn about honey bee farming, equipping them with the knowledge and skills needed to explore the many opportunities in this field.
